

# ZHANG, Hongzhen

Email: [zhanghongzhen1019@outlook.com](mailto:zhanghongzhen1019@outlook.com) Tel: 86-187-6580-1028

My Personal Website: [Hongzhen's Personal Website \(hongzhengit.github.io\)](https://hongzhengit.github.io)

## Education Backgrounds

---

**Tianjin University (member of 985, 211 universities)** 2017.09 – 2020.01, GPA: 85/100

Master's degree of Engineering, affiliated with State Key Laboratory of Precision Measuring Technology and Instruments

**Xiamen University (member of 985, 211 universities)** 2013.09 – 2017.06, GPA: 82/100

Bachelor's degree of Engineering, Major in Photoelectronic Measurement Technology

Double degree of Economics, Minor in Mathematical Statistics

## Publications

---

- **Extension of Terahertz Time Domain Spectroscopy: a Micron-level Thickness Gauging Technology**

Hongzhen Zhang, Lili Shi, Mingxia He\*. *Optics Communications*, 506 (2022) 127597.

- **Terahertz Thickness Measurement Based on Stochastic Optimization Algorithm**

Hongzhen Zhang, Mingxia He\*, Lili Shi, Pengfei Wang. *Spectroscopy and Spectral Analysis*, 40(2020) 3066-3070.

- **A terahertz non-polar material detection technology based on Rouard's Method**

with Mingxia He, Lili Shi and Pu Wang. *Invention patent*, Patent No. CN201910303091.9, Waiting for granting.

- **A thickness measurement technology developed with terahertz spectrum**

with Mingxia He, Lili Shi and Pu Wang. *Invention patent*, Patent No. CN201811197783.1, Granted.

- **A multispectral imaging device for the Meibomian glands of human eyes**

with Yanping Chen, Tianyu Zheng and Yifan Yang. *Invention patent*, Patent No. CN201610250677.X, Granted.

## Research Experiences

---

**Research on the applications of heuristic algorithms in information extraction methods for Terahertz Spectra**

Tianjin University, Funded by National Natural Science Foundation of China (NSFC) (Grant No.61675151).

**Research on a multispectral imaging device for meibomian glands of human eyes**

Xiamen University, Undergraduate research project.

**Research on HAR (Heterogeneous Autoregression) models for Shanghai Composite Index**

Xiamen University, Graduation thesis for my double degree of Economics.

## Working Experiences

---

**Discover Financial Service (DFS, Shanghai COE) Senior Analyst**, 2020.03 – 2022.07

- *Project 1*: Developed a Time Series Forecast Model for home loan application volumes to catch the increasing trend in home loan market and help with the future workforce management.
- *Project 2*: Constructed a Neural Network compliant recognizer based on pre-trained Bert model, combined it with a Random Forest classifier to allocate customers' complaints into specific categories automatically.
- *Project 3*: Designed and built a Data Management Platform with PyQt framework for structuring and maintaining invoice data from third-party vendors.

**Analog Devices (ADI, Beijing Office) Part-time Algorithm Intern**, 2019.07 – 2020.01

- Borrowed the c-Lasso algorithm from Muhammad Tabassum (2018) to get a simplified Generalized Memory Polynomial (GMP) Model with sparse parameters.

## Awards

---

- Innovation Award at Discover Financial Service
- Excellence Award at Discover Financial Service
- 1st prize of China National Mathematical Modeling Competition (Undergraduate Group)

## Programming Skills

---

I have solid skills in Python, MATLAB and SQL language and I am also familiar with R software. For more information about myself and my research/working experiences, please check my personal website <https://hongzhengit.github.io/>.
